SKILLS

Product & UX Design

- Double diamond end-to-end
- User research & usability testing
- Mobile & web platform design
 - Design systems
- Accessibility & inclusive design
- Design engineer [AI executed workflows]

Software

- Figma
- Claude Code [terminal]
- GitHub
- Adobe [Photoshop, InDesign, Illustrator]

Brand & Graphic Design

- Brand identity & visual systems
- Digital & print design
- Creative concept ideation & execution

Soft

- Communication
- Collaboration
- Personal value: leading with trust and vulnerability first

EDUCATION

User Experience Design

General Assembly Sydney
2018

Digital & Graphic Design

University of London
2014

Business Development Apprenticeship

The AAR Group, London
2013

REFERRALS

Ben Margison

Head of Design
SafetyCulture

Kael Matthews

Design Manager
SafetyCulture

TARA SHEFFIELD PRODUCT DESIGNER

TL;DR

I believe the best problems to solve sit at the intersection of desirability, feasibility, and viability – solving the right problem before solving the problem right. That means working as a triad with engineering and product, staying closely connected to customers through research [moderated calls, usability testing] and building relationships across Customer Success, Support, GTM, and Marketing to understand where design can have the most impact.

Within SafetyCulture's Analytics domain, I led data visualisation work – modernising how customers create, visualise, and act on their data – and was part of the team behind the platform's earliest AI investigation, validating real world usage alongside customer appetite.

13 years of design experience [spanning brand, advertising, and product] underpins all of this, sharpened by a UX/UI Design course through General Assembly Sydney in 2018.

NOV 21' - JUNE 26' PRODUCT DESIGNER SAFETYCULTURE

ROLE SUMMARY

I joined SafetyCulture's Product Design team within the Analytics domain, where dashboards and reporting were core to how 75K+ organisations understood their safety, quality, and compliance data. Leading end-to-end design through the double diamond process, I worked closely with product and engineering to modernise how customers create, visualise, and act on their data, from legacy chart-building workflows through to AI-assisted analytics. As SafetyCulture began investing in AI, I was moved into the company's earliest AI discovery and validation project, validating how and what insights should be surfaced across the platform, with the aim of AI proactively surfacing the right data to the right person at the right time.

CASE STUDY

AI TEXT TO CHART

Designed a conversational, AI-powered chart builder to fix the #1 complaint about SafetyCulture Analytics; that building a chart was too manual and fiddly to bother with. Reached launch-readiness before the roadmap shifted.

Key points

- **Problem:** only ~45% of users who started building a chart actually finished it (Nov 2024-Mar 2025) – 'the learning curve' came up repeatedly in customer calls.
- **Approach:** a natural-language chat interface that generates a chart instantly, then asks guided follow-up questions [metric → attribute → filters → chart type → config] only when needed.
- **Scope:** deliberately limited v1 to one entry point [the Analytics landing page] – excluded dashboard-level chart creation to avoid filter-consistency issues and match design capacity.
- **Success metrics defined:** lift completion rate past the 45% baseline; track % of charts created via natural language as the adoption signal.
- **Status:** design and spec reached launch-readiness planning before the roadmap shifted.

KEY PROJECTS

KPI visualisation

Web

Shipped

Poor UX → unlock \$770K ARR

PROBLEM → OPPORTUNITY

Shipped, impact not tracked

OUTCOME

Item scores

Web

Shipped

81 customer requests → unlock \$1M ARR

PROBLEM → OPPORTUNITY

Shipped, closed legacy gap

OUTCOME

Media-editing experience

Mobile

Shipped

Legacy UI → improve UX

PROBLEM → OPPORTUNITY

Shipped, validated by user testing

OUTCOME

Holistic Analytics discovery

Web

Research

83.6% of paid orgs unused → drive adoption

PROBLEM → OPPORTUNITY

Reshaped FY26 roadmap

OUTCOME

Project TARS validation

Web

Research

Unclear AI value → validate framework

PROBLEM → OPPORTUNITY

Informed adoption company-wide

BRAND DESIGNER SAFETYCULTURE

Owned and evolved the SafetyCulture brand across all internal and external touchpoints, working closely with marketing, product, and communications teams.

KEY CONTRIBUTIONS

- Created the refreshed SafetyCulture logo [2022]
- Led the end-to-end brand refresh – colours, fonts, graphics, photography, and brand vision
- Led the internal refresh of all company collateral: presentations, graphics, and supporting materials
- Managed ongoing collaboration between marketing and product teams

APR 19' - NOV 21' SNR GRAPHIC DESIGNER SHOPPER MEDIA

Led creative design across Shopper's internal and external brand communications, spanning digital advertising, social media, EDMs, DOOH, presentations, event collateral, and client-facing campaign assets.

KEY CONTRIBUTIONS

- Brought the new Shopper brand to life during its launch – website takeover on Mumbrella, social network, internal documents and stationery.
- Contributed to a \$350k sales win by elevating Cetaphil creative with animation.
- Supported brands' go to market campaigns including McDonalds, Burgen [bread], and Coffee Club.

NOV 16' - JAN 19' GRAPHIC DESIGNER CARAT AUSTRALIA

Worked on national design projects across new business and trade marketing, delivering consistent branding through internal and external communications.

KEY CONTRIBUTIONS

- Creative design across >50 national pitches; winning Pandora, CBRE, Event Hospitality, Nova, and retaining Woolworths Group.
- Carat Redefining Series – thought leadership design visualising key data insights through infographics, imagery, and video.
- Praised by both client and agency for creativity, functionality, cost-effectiveness, and vision.
